## Kyoto Japan Air-Conditioning & Refrigeration Gases

A Family of  
**Car A/C  
& Commercial  
Refrigeration  
Gases**

Refrigeration and Air-Conditioning gases are widely used for residential air-conditioning, chiller, commercial refrigeration, industrial refrigeration, domestic refrigeration and automotive applications.

Air-Conditioning & Refrigeration Gases have direct impact on the environment and climatic conditions and hence they are fully controlled under a quota system in Europe and advanced countries. Selection of high-quality gases is essential to comply with current EU legislations. Kyoto Japan supplies the following

Refrigeration and Air-Conditioning gases from Italy & Asia:
